

We have been in business for
27 years!

We constantly strive for perfection and mind every single detail - that is why we carry out designs not only in **Poland**, but also in **the European Union**. We are open to **new challenges and experiences**.

CITY LOUNGE

Authors:

Grzegorz **Bień** - Ewelina **Gdak** - Michał **Gdak**
Institute of Design Kielce

ZANO co-creates the project **City Lounge - a modular land-use plan for public space**

The main asset of the design is its **modularity**, that is giving the possibility of custom arrangement of a public space. The advantages of this approach are the possibility of a closer integration among the residents, relaxing and working in a green environment. The project may be preceded by a public consultation with residents of the city. The whole construction is based, literally and figuratively, on greenery – planters for trees provide stability for other elements of street furniture. Materials used for this design are **sapeli wood and stainless steel**.
